Introduction

Feedback from Stakeholders on Curriculum

Internal Quality Assurance Cell makes it a tradition to mandatorily collect feedback from stakeholders- students, teachers, employers and alumni. This is done by the Feedback Committee. They collect and analyse the feedback received and make suggestions to appropriate bodies so as to initiate the action for improvement. In past it used to be collected manually, but shifting the institute on technology, it has been made system supported & online

Objective:

The objective of the exercise is to correctly gauge the impact of all the efforts taken by the institution at all levels on the various stakeholders. The institution wants the benefits to reach up to the stakeholders. This feedback is collected and trends generated through statistical analysis. Based on the opinions of the stakeholders, further action is taken by the administration.

Methodology:

- Feedback on curriculum is collected from the students by uploading the Feedback Forms at the SUMS Application. It is exported and brought to the IQAC for its analysis. The Statistical data is handed over to the Feedback committee. Further suggestions are incorporated by departments, college Council and governing body.
- Alumni Feedback is collected during alumni meetings & even online. The filled in forms are sent for further action. Feedback is collected from teachers as well by uploading the feedback forms on the portal. Subsequent action is similar to the other forms.
- Employers' Feedback is also collected either in person or online for further action.
- The teachers or peers also give their feedback which is available at the SUMS application and the received data gets forwarded to the authorities for further action.
- The feedback committee collects inputs and suggestions from the stakeholders and further action to be taken is discussed with departments and authorities. The decisions taken by the authorities are forwarded for action to be initiated

Analysis:

- The data get compiled and analysed by the members associated with the committee. It then goes for deliberation to the IQAC, College Council and the Governing Body.
- General Action Plan after data collection and analysis
- Annual Feedback Action Taken Report given after analysis of stakeholders' feedback.
- Meetings are held at the department level, college council and Governing Body to discuss the suggestions and trends and feasibility of implementing the suggestions in the feedback.
- To make curriculum more effective, Add-On courses were started and conducted.

DR. G.D. POL FOUNDATION

- More activities planned for better results and holistic development.

Table 1. Details of Feedback taken

SR.NO.	Stakeholder	Frequency	Way of collecting the feedback	Tool used
1	Students	Yearly	Regular Teaching classes	Google form link
2	Teachers	Yearly	Principal Meetings	Google form link
3	Alumni	Yearly	Informed Visits	Google form link

Apart from the feedbacks obtained from the teachers, parents and the stakeholders, students feedback are also noted with a focus on students' opinions on the teaching, teaching staff, infrastructure learning process, and also the mode of education. The idea behind obtaining these feedbacks is to get the opinions and feedbacks of the students on the actual teaching process. Under the profile of the students, in which year the students are studying is taken into consideration.

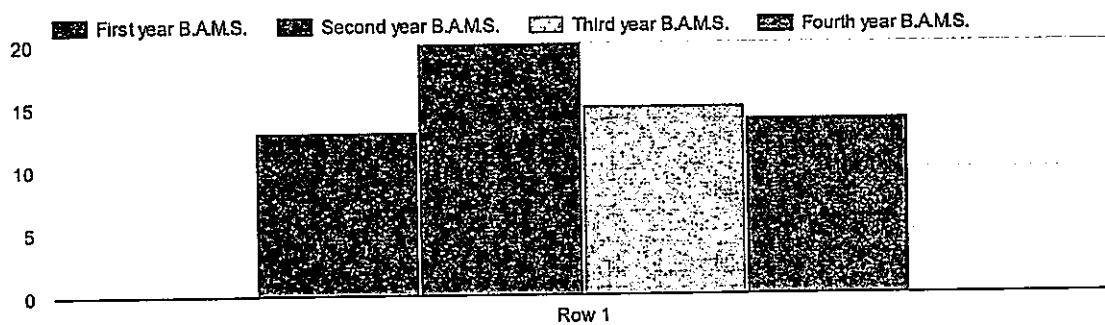

Feedback analysis report

Feedback on UG curriculum from Teachers

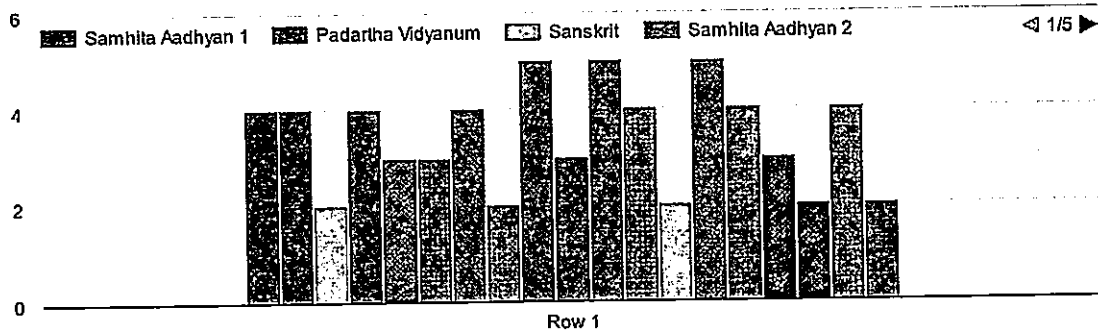

Graph 1.1 Number of Teachers teaching to UG students

Please select Year you teach

Graph 1.2 Subject wise number of teachers

Feedback analysis report

Feedback from Alumni

Along with the feedbacks obtained from the alumni's' feedbacks are also noted with a focus on their opinions on the teaching, teaching staff, infrastructure learning process, and also the mode of education as well as the course outcome. The idea behind obtaining these feedbacks is to get the opinions and feedbacks of the students on the actual teaching process as they are the passed-out students form the institute and working in the industry. Hence there is a need to take their views and opinions on the program outcomes as they are actually applying their knowledge in the industry which they have got form the institute.

Suggestion for improvements

Institution

6 responses

Theoretical knowledge is important but practical knowledge is also importantbut student just get into books due to exam pressure ..

Good

It should be more student oriented...and host some more holistic programs...and Internship shouldn't be about just scolding ..it should be more about teaching students your knowledge

Practical oriented teaching, minimum 40% of syllabus should be covered and teachers should improve their teaching skill

No need

No
